On October 13, 2015, petitioner filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*,² [the “Vaccine Act” or “Program”]. compensation for her complex regional pain syndrome,³ which she sustained following receipt of the flu vaccination on November 1, 2013.” *Id.* Respondent agrees that “[t]he facts of this case support a finding that petitioner’s CRPS, more likely than not, was caused by the administration of the influenza vaccination on November 1, 2013.” *Id.* at 4. Additionally, respondent indicates that the record demonstrates that the claim was timely filed, “that petitioner received a vaccine set forth in the Vaccine Injury Table, and that the vaccine was received in the United States.” *Id.* Respondent further indicates “that petitioner suffered the effects or sequelae of her injury for more than six months after vaccine administration,” and that the petition indicates petitioner has pursued no prior civil action or proceeding in connection with her injury. *Id.*

In view of respondent’s concession and the evidence before me, the undersigned finds that petitioner is entitled to compensation.

IT IS SO ORDERED.
